

PUMPOUT BMPs

Best Management Practices to Reduce Impacts to Marina Septic System and Groundwater From Discharge of Holding Tank Chemicals

NO BOAT CHEMICAL DUMPING

- Only use pumpout for the disposal of sewage. Do not dispose of chemicals or cleaning products via the Marina pumpout system.

LIMIT USE CHEMICALS IN HOLDING TANKS

- We encourage boaters not to use any chemicals in your holding tanks. Odors from holding tanks can be reduced by emptying the holding tanks more often, ensuring the ventilation system is functional, and by flushing the holding tank out to remove solids each time the tank is dumped. Use air fresheners in Boat bathrooms to eliminate persistent odors.

THANKS FOR DOING YOUR PART

The sewage from this Marina is treated by a large on-site sewage system permitted by the WA State Department of Health. To reduce chemical loading on this system the above BMPs need to be implemented. **Please contact the Harbormaster at 360-417-3440 with any questions or comments.**
