Introduction

Under Washington State law, Washington port districts are entrusted with broad powers to develop and operate programs and facilities designed to promote and encourage the development of transportation, commerce, tourism, and industry. The Port of Port Angeles’s vision, mission and core values, along with its strategic plan provide the policy-level direction for programs and activities undertaken by the Port.

The Port’s Comprehensive Scheme reflects the intended plans for capital spending in the near future; however, these plans can change due to shifts in operating budgets, economic opportunities, and community priorities. The Comprehensive Scheme is amended, as necessary, to authorize anticipated improvements, acquisition or sale of real property, or adoption of plans and programs; making it a living document. Revisions occur through formal resolutions adopted by Port Commission.

Comp Scheme and GMA

Comprehensive plans are required of cities and counties which fall under the State of Washington’s Growth Management Act (GMA) codified as RCW 36.70A. Ports, on the other hand, do not exercise land use authority as do cities and counties under the GMA. Instead, Ports are subject to the planning requirements and the adopted Comprehensive Plans of the cities and counties in which the Ports operate.

Instead of Comprehensive Plans with their GMA connotations, Ports are required to comply with RCW 53.20.010, which requires a Comprehensive Scheme of Harbor Improvements. Courts ruled the Port’s bundle of budget and planning documents including the Comprehensive Plan document satisfy the requirement of a Comprehensive Scheme of Harbor Improvements.

Terminals 1 & 3

Background

The Port of Port Angeles first enacted a Comprehensive Scheme of Harbor Improvements in 1924 in the form of Commission Resolution No. 5. Following Resolution No. 5, the Port of Port Angeles Comprehensive Scheme of Harbor Improvements took the form of a series of resolutions amending or supplementing that original plan. A summary of resolutions constituting the history of the Port’s CSHI as amended is set forth in Table 1.

In 1987 the Port Commission adopted a new CSHI, incorporating in a single document, plans for all port facilities. The 1987 CSHI was updated as required through 2013. In 2015 the Comprehensive Scheme of Harbor Improvements was redrafted to reflect the dynamic nature of Port planning and development.

2015 Comp Scheme

In January 2015 the Comprehensive Scheme of Harbor Improvements format was modified from the lengthy 1987 scheme. The 2015 and current CSHI is a preface for the current planning and budget documents in use by the Port.

Port Property

Appendix A of this document is a comprehensive overview of current Port property and includes current use, and reference to applicable Port planning documents.

Budget & Planning Documents

The current budget & planning documents, as they now exist or are hereinafter amended, incorporated into the Port Comprehensive Scheme of Harbor Improvements are as follows:

- Port of Port Angeles, Strategic Plan: 2025-2026
- Current Capital Budget: 2026
- Recreation and Public Access Plan: 2024
- Clallam County Hazard Mitigation Plan Update: 2024
- William R. Fairchild International Airport Master Plan Update: 2019
- Marine Trades Industrial Park Master Plan: 2018
- Sekiu Airport Layout Plan: June 2013
- Central Waterfront Master Plan: 2010

Federal, State, Local Regulations

In addition to the guidance presented in the Port’s current planning documents, development in or above marine environments generally also requires permits from federal, state agencies and local government (City of Port Angeles & Clallam County). Local municipality and county permits are required to cover local building codes and meet the requirements of the Shoreline Management Act.

Federal and State permits are usually required when impacts to navigable waters or fish and wildlife habitat are anticipated. Development activities waterward of the mean higher high water (MHHW) for tidal waters are regulated by the U.S. Army Corps of Engineers (USACE or Corps), Washington State Department of Ecology (WSDOE), and the Washington State Department of Fish and Wildlife (WDFW).

In addition, the National Oceanographic and Atmospheric Administration (NOAA Fisheries) and U.S. Fish and Wildlife Service (USFWS) must concur that any project requiring federal approvals (a USACE permit, for example) is consistent with the Endangered Species Act (ESA). These agencies will require that proposed projects avoid or reduce project impacts on certain fish and wildlife species through design and/or environmental controls or mitigate impacts through restoration activities.

State Environmental Policy Act (SEPA)

A project or plan prepared by the Port will be subject to SEPA analysis. The Port is authorized by state law to act as its own lead agency. That means that, whenever the Port requests a land use permit, such as a shoreline permit from the City, it will be required to fulfill the environmental documentation requirements of SEPA.

The Port complies with SEPA's environmental review processes by:

Each improvement identified as a physical Project will undergo individualized SEPA review as soon as the "principle features of a proposal and its environmental impacts can be reasonably identified... and the environmental effects can be meaningfully evaluated." (WAC 197-11-055).
